

Globway on the World-Wide-Web

Mobile billing has various names in the various countries, like for example Operator Billing, Direct Billing, Content Billing, Mobile Content Billing, Direct Operator Billing (DOB), Mobile Payment & Mobile Enablers (MPME), Wap Billing or MobilePay. These names all mean the same.

One click billing (sometimes two clicks) for your content on a mobile internet screen (Wap). Mobile billing allows consumers to click and pay via their mobile telephone bills or prepaid balance. In some countries this billing method can also be used in order to bill Web content.

Globway ensures contracts with mobile operators or regional aggregators and unifies them in a single point of entrance for its customers. Globway facilitates international payments and subscriptions for its customers.

Compliance and regulations should be followed by Globway's customers. Globway informs its customers but cannot be held responsible for the traffic chain in front of their actual gateway. It's like holding your bank accountable for a trickster that steals your pin-code or forces you to make a withdrawal.

However Globway understands its position within the chain and will help customers get refunds from its customers.

Global Mobile Billing Connections:

Globway has integrated at this moment Mobile Billing in The Netherlands, Germany, Switzerland, Austria, Spain, Italy, Belgium, France, Norway, UK (United Kingdom – Payforit), Ireland, Australia, South Africa, Mexico, Kenya, Poland and Portugal. In 2015 we will start in other Nordic countries (Sweden, Finland). Other countries on the rollout map are for example Canada, Brazil, Colombia, Turkey, Vietnam, Malaysia, Peru, Taiwan, Philippines.

Technical Mobile Billing Connections:

The variety of Mobile Billing connections, as each operator / provider has his own API, is translated by our highly experienced technical staff to One API for our partners. Your technical team is in direct connection with our technical team, no account managers or other office staff in between. This results in fast implementation processes and quick communication in case of questions or changes. Globway has a 365 days a year, 24 hours a day technical support in order to be able to respond every moment of the year to changes or (support) outages. All planned outages from operators and providers are communicated via an online reporting tool where our partners can also find their statistical information and their Notice-to-bills.
